CURE OF A COUGH

The following letter has been received from WILLIAM BOARDS, Esq., an extensive agriculturist and land agent, residing at Edmonton, Middlesex:—

"Nightingale Hall, Edmonton.

"Dear Sir,—I have recently suffered much from a most violent cough, proceedin,; from a tickling in my chest, which no remedy, out of many I resorted to, could allay. My head was constantly ashing, and my whole frame entirely shaken Having seen the good effects of your Balsam of Aniseed in several members of my family, I purchased a small bottle, and, when going to bed at night, took a teaspoonful in two tublespoonfuls of water, just warm. The effect was immediate; it arrested the tickling in my chest, I slept well, and arose perfectly restored in the morning, with the exception of debility, arising from fatigue by incessant coughing for some days previous. My cough entirely left we, and has never returned Having since heard of a lady in the neighborhood who for a long time had laboured under a most distressing cough, and who had resorted to every remedy within her knowledge, I sent the remainder of the bottle to her; and that long-standing, obstinate, and (as she thought) incurable cough, was perfectly cured. You are at perfect liberty to make what use you may please of this communication, as the contents are strictly true I shall take every opportunity of recommending your in-stimable medicine, feeling as I do fully assured of its efficacy.
"I am, dear Sir, yours very truly, your inestimate and assured of its efficacy.

TO AGETTE.

English Mail Summary. The papers per Continental and Active are to the 24th of October and contain only a few items of interest to readers in this part of the Empire. The most exciting topic is the elections, the result of which we have been already advised by telegraph. The Investigation Committee appointed to inquire into the affairs of the Royal Bank of Liverpool bave presented their report, and a most extraordinary document it is. All real power seems to have been monopolized by the two managing directors, Mr Hutchison and Mr Shand, of whom one owed the bank when it stopped £102,477, of which £70,000 will be lost; and the other usually owed £20,000, which will, however, be paid. Only these two directors seem to have been cognizant of an astonishing agreement under which the Royal Bank contracted to carry on Messrs Wilson & Co., shipdealers, who owed the concern £60,000. Rather than lose that money, or to speak more plainly, rather than call attention to the accounts, these gentlemen bound the bank to pay Messrs Wilson's debts and all other debts their business might incur in five years, and to re-lesse Messrs Wilson from all demands. Under this arrangement the total debt became £528,000, and another firm was similarly troated to the lune of nearly £100,000. All this while the bank was represented as most flourishing, and the board congratulated the shareholders on the flourishing character of the statement. Mr Purchas, the Ritualist minister of St James' Chapel, Brighton, who has been inhibited by his bishop,—the Bishop of Chichester,—from preaching and who persists in doing so, main-taining that he is in the position of an incumbent; and not amenable to the Church Discipline Act,—has been caricatured in Punch as a boy threatened by his master (the Bishep) with a birch rod made of the Thirty-Nine Articles, and told that he may set the Church on fire if he goes on like this, to which Master Purchas replies, 'Just what I would like to do,—there.' The Pall Mall says that the likeness is very good, hair and all,—(the hair is very good, hair and all,—the hair is v plastered puritanically down on Master Purchas's head in a fashion hardly sacredotal, and certainly not ornamental, or in keeping with the gorgeous chasuble.) It seems that Archbishop Manning in 1840, when he was still a Protestant, stood sponsor to Mr Giadstone's eldest son. Consequently, Mr Gladstone is abolishing the Irish Church out of friendship for Dr Manning. This absurd calumny has been seriously repeated in Liverpool, and seriously repeated in Liverpool, and the Archbishop has therefore written to the Mercury to explain the facts. His close friendship with Mr Gladstone, he says, was suspended in 1851, when he entered the Catholic Church, and for twelve years they never met.
Subsequently, public duty renewed
their communications, Dr Manning communicating with every Government The Archbishop concludes his letter by a warm testimony to the transparenttruth of Mr Gladstone's mind, and his almost faulty impatience of insincerity and selfishness in public affairs The Commission on International Coinage bas presented its report, which amounts in brief to this: taings must be let alone. An international comage is impossible, unless the English pound be altered, or the world accepts that as the unit. We cannot alter is without endangering credit, and the world shows no disposition to accept it. Consequently, the matter must drop. It is stated that the rates of insurance for sea-going vessels are now double what they were thirty years ago, and are unprofitable even then, the cause being the recklessness of the small ors who buy naseaworthy ships insure them, and run them on the principle of "Heads I win, tails you lose." It the crew get through the lose." It the crew get through the voyage, it is profitable; if they sink, the cargo is insured. The Times recommends the appointment of inspectors of shipping as the only remedy, and it will come to that, but we wish to ask one question. How come the underwriters to insure such vessels? But for the insurance they would not be sent out, and part, at least, of the responsibility therefore rests on Lloyds. Captain Moncroiff's new method of mounting gun-carriages has been again tried, and seems to have been com-pletely successful. A heavy piece of artillery can be worked in a hollow made in the earth, the gun being raised and-depressed at will without the gun-ners being exposed. At present they must either stand exposed to the enemy,s shot or be protected by a heavy masoary wall with a great hole in it for the missiles to pass through. Now the earth acts as well as the

can be hit only by a vertical shell

very unlikely to drop just at the right

place. Consequently, the cost of building masoury walls is abolished, while

the ganners fire in perfect security, a

great increase both to the defensive power of a garrison and a great reduc-tion in the expense of fortification. Captain Moncreiff will be as well known in Europe as Herr Dreyse. The usual Parliamentary return of steam vessels registered in the United Kingdom shows that on or before the lst of January, 1868, there was registered 2880 vessels of 892,429 tons registered tonnage, and 1,310,033 gross tonnage. Towering above all the others is the Great Eastern, with its dimensions of 679 ft. by nearly 83 ft., its engines of 2660-horse power, and its gross tonnage 18,916 tons. Several other vessels have engines of 1000. horse power or more. A correspondence between Admiral Rous and Mr Padwick has been published, in which the female and the second secon the former declines to withdraw his statements respecting certain transactions connected with Lord Hasting's racehorses, desiring that all matters should be explained upon oath at the trial of a pending action brought by the trainer (Mr J. Day.) In Paris a report is current that the Emperer intends to upones a general disease. tends to propose a general disarma-ment. The semi-official Press speak of an intended granting of furloughs upon an extensive scale. The Emperor still remains at Biarritz. We are told from Berlin, that the Krupp improved steel gun has fairly beaten the Armstrong gun in recent competitive trials. For the South Australian Government Loan of £400,000 the tenders amounted to £3,500,000, and those accepted ranged between £108 10s and £107 5s. The projected journey of their Royal Highnesses the Prince and Princess of Wales abroad has now been definitely decided. They will leave England about the mid-dle of November to proceed to Paris, Germany and Denmark; afterwards Greece and a portion of Asia Minor will be visited, and finally the distinguished voyagers will proceed up the Nile to the second cataract. The celebrated African traveller, Sir Samuel Baker, will accompany them on this portion of the journey. No yacht being at present available which is suitable for the purpose, a fast steam frigate wil be told off for the sea passages. The suite will consist of Lady Morton, Hon. Mrs. Grey, Colonel Kep-pel, and Dr. Minter.

THE steam fire-engine for the Tiger Company of this city arrived yesterday on the Continental and is one of the most powerful and beautiful apparatuses of her class yet constructed. Her total cost, laid down here, including freight and charges, will be some thing over \$4300, of which sum about \$2680 is already paid. The freight and charges from New York city amount to \$763 75. Upon the withdrawal of the opposition steamships, about six weeks ago, the regular line doubled the rates of freight-a possible circumstance which was not taken into consideration at the time of ordering the engine. The balance-about \$1700-remains to be made up before the engine will be handed over to the company, and we learn that the subscriptions of the public will be asked to assist in liquidating the indebtedness, so that the apparatus may pass immediately into service. Of late, the immunity from fire with which our city was long favored, appears to have terminated, and we have had to chronicle the occurrence of several destructive conflagrations, the damage resulting from which might have been lessened had steam been employed instead of handpower. In the thickly settled portion of our city the danger from fire, always great, is enhanced during the period of severe gales, to which we are subject in the winter; and we know of no more opportune time for the arrival of this engine than the present. To. wards the money already paid the Tigers subscribed the bandsome sum of one thousand dollars from the pockets of individual members Every citizen who has property likely to be jeopardized by the destroying element should contribute to free the Tigers from debt, and place an efficient method of overcoming a common enemy at the disposal of a meritorious body of men who, without fee or reward, prove the happy feeling of selfsatisfaction which ever attends the perform ance of good deeds, spring to duty at a

moment's call. THE HUDSON BAY COMPANY'S TERRITORY. -The London Star in a recent issue says :-As is well known, the government of the Hudson's Bay territories has long been offered to Canada, and has been accepted by the Legislature of that Province, subject to certain conditions. Negotiations between the Imperial Government and the Hudson Bay company are in progress, with a view to the settlement of the terms upon which the latter body will agree to the cession of the extraordinary privileges conferred upon it under the charter of Charles II. As these negotiations may at any moment | bear fruit, and the country be opened up to settlement, a number of gentlemen, headed by Lord Ebury, Lord Alfred Churchill, and many well known members of Parliament, have addressed a memorial to the Premier, urging that the Indian title should be equitably extinguished, and extensive reserves of lands set apact for the use of the native tribes. to avert the sanguinary border warfare which has been so injurious to one race and so fatal to the other, in almost every part of the North American continent. Mr Disraeli, in a letter to Mr Fowler, has promised to consider the

A NEW STEAMER .- We are informed by Mr Welcker, Agent of the Holladay Line, that he has received intimation from San Francisco of the Company having purchased the steamer Pelican, expressly for this route. The Company, it appears, have naturally been incommoded in their arrangements by the loss of the Del Norte, to avoid which, in future, the present purchase has been made. The Pelican has only recently come from New York, is one of the modern cleet-built vessels of the Clyde, with double propellers, and will carry, it is said, 400 tons, She is now having the necessary alterations made in her accommodations, with a view to ensure the comfort and convenience of passengers. It is supposed the Pelican will be the next direct boat from San Francisco, Our citizens will be glad to learn that the late interruption to our steam communication is now likely to end.

SEYMOUR AND BLAIR only carried three Weithern States-New York, New Jersey and Oregon-and five Southern States.

Poisoned Stockings .- An English chemist has made a startling announcement to the magistrates at the London Guildhall. A gentleman had consulted him in reference to a diseased foot. No assignable cause for its condition could be ascertained, until he had examined the stockings worn by the patient. These he found were colored a bright red and brown, striped transversly with orange. On calling the manufacturers' attention to this, investigations were made, which, at an expense of £1,000 resulted in the cancelling of a large order for stockings colored by these bues. It was ascertained that flannel and silk shirts have been similarly dyed. We call attention to the subject to induce our dry goods importers and manufacturers to be particularly careful in examining articles of this kind which they supply to the public.

POLICE COURT:-The Chinaman Ah Mow, alias Charley, under remend for stealing a portion of the Methodist Communion plate, was before the Court again yesterday, and and sentenced to three months' imprisonment. The other property found in his shanty has been identified. There is no doubt the fellow s a regular prowling thief and is well out of the way. Wm Steinberger was charged with rendering a false account of liquors distilled by him during the month of October. Mr McCreight, instructed by Mr Bishop, appeared for Mr Steinberger. After an explanation from the learned counsel, that no wilful fraud was contemplated against the Government, and proof being offered to that ffect, His Worship inflicted the lowest penalty the law allowed.

DR DECAISNE, while engaged in investigating the influence of tobacco on the circulatory system, had his attention called to the large number of boys between the ages of nine and fifteen years who were addicted to smoking. Of thirty-eight boys who smoked, wenty-seven showed distinct symptoms of disease. Thirty-two had various disorders of circulation; bruit de souffle in the neck, disordered digestion, palpitation, slowness of intellect, and more or less taste for strong drinks. Eight showed a diminution of the red corpuseles of the blood; three had intermittent pulse; twelve quite frequent epitaxis; ten disordered eleop; and four ulceration of the mucus membrane of the mouth.

THE steamship Active, Captain Sholl, arrived yesterday afternoon from Portland. She brought 21 passengers and 181 tons of freight. The cause of her detention was the severe gale blowing from the SE, which rendered it impossible to cross the bar-the sea breaking directly across the channel. It was only after the second attempt on Sunday noon that she succeeded in getting over She brings an Express and eight bags mail matter. This detention of the Active affords another strong argument in favor of the Overland Railroad to Puget Sound. She will leave again for Portland this afternoon.

ST ANDREW'S SOCIETY ANNUAL DINNER This Society held their anniversary dinner at the Colonial last night. Over forty gentlemen sat down, and the Haggis-the favorite dish of Scotia's sons was admitted to be excellent. It was at a late hour when the worthy sons of St Andrew broke up, but the good things said, when the soul and intellect were moved, must be given to-morrow.

THE RACE .- The match between Volreece and Lucy for \$250 aside is definitely fixed for one o'clock to-day. The stakes have been for some days doposited in Mr Golden's hands, and as both animals, it is said, are really entered to win an exciting race is anticipated. Considerable betting is going

WASHINGTON, Nov. 21-The Navy Department has received voluminous despatches from Admiral Davis relating to affairs in Paraguay. Nothing appears to justify the apprehensions expressed in the papers in regard to the treatment of Bliss and Washburne. Commodore Kirkland of the Wasp, had an interview with Lopez who expressed unlimited friendship for the United States, and deplored what termed the unprincipled conduct of Minister Washburne. The Paraguayans treated the Wasp most hospitably, furnishing the needed supplies.

Washington, Nov. 24—Secretary Seward authorizes the following relative to Reverdy Johnson's negotiations of the Alabama claims, to correct irresponsible statements: Our Minister only reports progress in the late despatches to the State Department. The question of a penceful adjustment of the Alabama claims is approaching a settlement. things look favorable, but there has been no definite conclusion reached upon any important point up to this time. Johnson and Lord Stanley have not settled so far as to agreement on the protocol. There has been a good deal of correspondence between our Minister and the British Foreign Secretary, and a very friendly feeling pervades all this correspondence; but the only important fact yet developed is, that the prospects for an amicable settlement are favorable. It will not be wise for papers in this country to rely upon and publish all the rumors which leak out from the British Foreign Office and are sent abroad through the column of the London journals as truth Johnson has not been authorized from the State Department to vary in any particular from the instructions given nim on the eve of his departure to assume the duties of his office at the Court of Her Majesty.

Escobedo's forces fought badly, and before the fight was over hurrabed for Vargas and Canales, and finally declared in favor of the rebels.

Escobedo attempted to collect a force at Monterey, but failed, the soldiers refusing to march without being paid, and afterwards openly refused to fight against their Tamaulipas brethren. Advices from Paraguay state that Caxias with the allied army and fleet arrived in front of the Paraguayan works near Villeta, but was deterred from the assault by the natural defence of the position. A reconnoitering party, however, succeeded in capturing an important redoubt, while the iron-elads bombarded Angostura and held the fortifications. Lopez is reported to have shot both his brothers; his sister is in prison. Gen McMahon was about to go to Ascencion with the American fleet to obtain justice from Paraguay. Holloway's Pills.—Invalids distracted by indigestion and discouraged in their search for its remedy should make trial of this never-failing medicine. A lady, long a martyr of dispeptic tortures, writes that Holloway's Pills made her feel as if aburden nad been taken off her. Her spirits, formerly low, have greatly improved; her capricous appetite has given place to healthy hunger; her dull, sick headache has departed, and gradually so marvellous a change has been effected, that she is altogether a new creature, and again fit for her duties. London, Oct 19.

The Globe of the 20th denies the truth of a statement made by The Daily News that it has been agreed between Lord Stanley and Mr. Revordy Johnson that the respective claims of British subjects and American citizens, arising out of the Southern rebel-lion, shall be determined by an intercolonial commission, composed of an equal number of British and American members.

The fitter religious feeling which was provoked by the visit of Murphy, the anti-Cetholic lecturer, to Birmingham, and aggravated by the position taken up and the language used by the Conservative candidates, has commenced to show itself as the election approaches. Two meetings of the Conservatives have been uproatiously broken Conservatives have been uproariously broken up by Irish Roman Catholies. The Irish listen quietly for some time; till some cut-rageous statement in respect to the Irish Church or 'Popish blasphemies' was made use of, and then proving too strong for the roughs and the Orangemen, little or nothing more is heard from the candidates, the meeting being turned into a sort of wild beast ing being turned into a sort of wild beast show. Cousi-terable apprehension is felt that there will be disturbances before the contest is finished, and the pensioners, of whom there are a great number in the town have received notice to be in readiness if re quired.
The Express of the 20th says: Since the

riot at West Hartlepool, three weeks ago, Flyan, the anti-Catholic lecturer, by whose presence the disturbance was caused, has taken up his abode in the town, where he had allowed convent lectures; in the Oxford has delivered several lectures in the Oxford Music Hall, until at length 'business' falling off, he transferred his attention to Old Hartle peol, where, being refused a room, he de livered an harangue on the town moor on Saturday afternoon to some 500 persons. Although very violent in his language, he failed to create any breach of the peace. On Sunday, however, he again appeared on On Sunday, however, he again appeared on the moor, where the crowd numbered many hundreds of persons. Scarcely had the lecture begun ere a fight originating in some badinage between lads and women in Cleveland street, the Irish quarter, which is close to the moor, ensued between the rival creeds. A fierce cannonade of stones passed between the parties, whom the borough police, who only numbered some ten or twelve men, endeavored to separate, and were for a time exposed to great danger. Fortunately at this moment a body of more than 26 of the country force, under Superintendent Davidson, came up, and the combatanto were driven apart before any serious consequences ensued; but many persons, chiefly Irish, were more or less injured by the stones. It were more or less injured by the stones. It has been reported to the borough bench that Flynn has determined to take the Temperance Hail by main force, and a deputation of of the proprietors waited upon the bench, at the close of the petty sessions, to ask protection of their property, which the Mayor at once said should be given them.

The Star of the 21st says: An announcement appears in another part of our columns.

ment appears in another part of our columns that Mr Goldwin Smith will deliver a lecture Hall. Langham-place to-night. As this is the last time probably for many years that he will address an English audience, many of the leaders of the Liberal party intend being present, to show their sense of the great services rendered to the Liberal cause by the honorable gentleman; and we sincerely trust that all persons holding the same creed will neaver to be present to often manfully stood forward on their be-

The criminal statistics of England and Wa'es for the year ending at Michaelmas, 1867, show that 3,867 women were committed for trial charged with indictable offenses and 15.549 men—one woman to every for and 15549 men—one woman to every four men. An appreciable number of oflenses against the person must be acts of men only, against the person must be acts of men only, and a large number of crimes requiring physical strength, great daring, or special knowledge or opportunity, are commonly the work of men; but the roturns show that women have their part in deeds of violence. The Daily News of the 21st says that side by side with the account of press prosecutions in Italy we have nows of demonstrations of supports with Spain, which appropriate the says that the says that which approach.

tions of sympathy with Spain, which appear to have assumed too much of a Republican character to have been altogether acceptable to the authorities. This has been especially the case at Bologna and Perugia. In Florence itself the same spirit has recently been shown. A large crowd gathered round the National Guard on their return home from a march out, and called for Garibaldi's hymn, giving at the same time three cheers for the Republic: The National Guard refused to omply with a request thus made, and were hereupon hooted.

The correspondent of the Independence Belge, writing from St Petersburg, says that it is definitely resolved to dissolve next January the Constitution Committee of Warssaw, which served as the last line of demarcation between the Administration of Poland

cation between the Administration of Poland and the Central Administration of the Empire. Thenceforward Poland will be governed directly from St Petersburg on the same conditions as the other general governments, such as Lithuania, Podolia and the Baltic Provinces.

'On quitting Poland,' says the Figure of of the 20th, 'the Czar signed a ukase interdicting mustaches and imperials. Henceforward Poles are permitted to wear only whiskers. This latter appendix is reserved probably for the next visit.' This is of a verity shaving in detail. But it is incontestable progress. Formerly the Poles were shaved of their heads to the neck. Now they are only shaved to the skin. are only shaved to the skin.

The Figure of the 20th says that the Czar has forbidden the women of Poland to wear the Polish toquet, and has also prohibited the entry into Poland of all journals containing the Polish forbigure.

entry into Poland of all journals con'aining the Paris fashions.

The correspondent of the Independence Belge at St Petersburg, under date of the 12th, reports the arrival of Mayor Morris Chester, a black, but a highly civi ized gentleman, on a mission from the President of the negro Republic of Liberia to obtain for the page of the telegation of Regions. his Government the récognition of Russia, Major Chester, it seems, have been recogniz-ed as a diplomatic agent, for his coachman is permitted to wear lace, a distinction reserved for foreign diplomatists.
